

Be part of our interconnection story.

DE-CIX (Deutscher Commercial Internet Exchange) is the world's leading Internet exchange operator. At its locations in Europe, North America, the Middle East, India, and Asia, DE-CIX connects thousands of network operators (carriers), Internet service providers (ISPs), content providers, and corporate networks from more than 100 countries and offers peering, cloud and interconnection services. With a data volume of almost 34 Exabytes per year (as of 2022) and well over 1,100 connected networks, DE-CIX in Frankfurt am Main is one of the largest Internet Exchanges in the world. We are looking with immediate effect for a motivated

Software Engineer (f/m/d)

Our Offer:

At DE-CIX, we are a team of highly skilled professionals that manages the biggest Internet Exchange in the world. Our fast-growing platform is distributed across the globe and can be connected from over 450 cities in more than 100 countries. The software department is an agile team that develops and maintains the applications to manage DE-CIX globally. All of us share an open mindset in regards to learning new technologies while delivering high-quality software for production.

- You will be responsible for the design, development, QA and operations of our internal and external software
- What also awaits you:
 - an appreciative corporate culture and trustful teamwork with like-minded specialists,
 - great working conditions (extensive personnel development measures, an occupational pension scheme, weekly language courses, a job ticket, health promotion, support on children care, eldercare and lots more)
 - Exciting and diverse challenges in an innovative and international environment,
 - a crisis-resistant permanent contract with the world's market leader in its sector
 - extremely friendly and supportive colleagues

What's important to us:

- several years of experience as a Software Engineer, using languages such as Python, Java, practical knowledge in modeling of databases (SQL, ORM) and APIs (REST)
- Love and live clean code and exceptional object oriented design, practical understanding of good practices like SOLID, DRY and KISS
- Working knowledge and interest in DevOps approaches (CI/CD, Monitoring/Alarming), practical knowledge of computer networks (ISO/OSI layers, CIDR, IP, ICMP, CCNA-level) and Docker/Linux

Even more important to us than your professional qualifications are your passion for the technical possibilities of automation, professional experience in a comparable position, and a keen instinct for usability, with team spirit and a love of learning new things ideally rounding off your experience as a software engineer. So if you are looking for new challenges in the automation of processes and the development of related tools, we look forward to receiving your complete application, including salary expectations.
